

Dr. Serge Morand

Université Montpellier, France

Serge Morand is senior scientist at the French CNRS, associated scientist at French CIRAD, and invited Professor at the Faculty of Veterinary Technology, Kasetsart University (Thailand). His research focus on the links between biodiversity and health, by investigating the evolutionary ecology of host-parasite interactions. His recent interests concern the effects of global defaunation on the ecology of parasites and diseases at the frontiers of human health, animal health and conservation biology.
