

Prof. Dr. María Dolores Bargues

Professor

Universidad de Valencia, Spain

Prof. Dr. María Dolores Bargues

Affiliation

Chair Professor of Parasitology

Director of the Molecular Biology of Parasites and Vectors Research Unit

Deputy Director in the WHO Collaborating Centre on Fascioliasis and Its Snail Vectors, and in the FAO-United Nations Reference Centre for Parasitology

President of the Spanish Society of Tropical Medicine and International Health (SEM-TSI)

Project research responsible (PI) in the Collaborative Network on Tropical Disease Centers of Spain - RICET

Department of Parasitology, Faculty of Pharmacy, University of Valencia, Spain

e.mail: M.D.Bargues@uv.es

Her research has mainly focused on molecular epidemiology of: fascioliasis and its lymnaeid snail vectors worldwide, planorbid snail vectors of schistosomiasis, triatomine insects transmitting Chagas disease, culicid vectors of medical importance, and malaria transmission risk and spread in Europe and the likely impact of environment, human behavior and climate changes. Her team has more than 22 years experience on molecular techniques applied to disease vectors and parasite species. Member of several International Networks (ECLAT, CDIA, EDEN), and expertise in leading projects of the EC and other international and national agencies. She has received prizes and awards for her outstanding results in research. Second author most cited in Parasitology in Spain.
