

**Prof. Shin-ichiro Kawazu**

Professor

Obihiro University, Japan

---

Shin-ichiro Kawazu is a Professor of Advanced Preventive Medicine in the National Research Center for Protozoan Diseases at Obihiro University of Agriculture and Veterinary Medicine. He graduated from Kitasato University, School of Veterinary Medicine in Japan with DVM. He received PhD degree in Veterinary Medicine on classification of benign *Theileria* species in cattle from Hokkaido University in 1993. The current approach in his group is the development and application of genetically modified *Babesia* parasite for investigating host-parasite interaction in this parasites species.

**Prof. Dr. Kiew-Lian Wan**

Professor

Kebangsaan University, Malaysia

---

Dr. Kiew-Lian Wan is currently a Professor at the Faculty of Science and Technology, Universiti Kebangsaan Malaysia. He obtained his PhD from the University of Cambridge, United Kingdom in the field of Molecular Parasitology. For much of his research career, he has worked on the genomics and molecular biology of the *Eimeria* parasites. His current research is focused on studying parasite-host interaction and understanding the molecular basis of disease control.
